

MAKING THE RIGHT DECISION FOR YOU

- Talk to your health care provider about whether or not screening is right for you.
- Mammography increases the chances of early detection of breast cancer
- Women can experience both a false positive, creating unnecessary worry, as well as a false negative, leading to false reassurance.
- **Be Breast Aware:** see your health care provider about any new breast symptoms even if you have recently had a normal mammogram

SCREENING ELIGIBILITY

- Women aged 50-74, every 2-3 years
- Women ages 40-49 and 75+ can self-refer into the Program if they so choose
- No breast implants
- No previous breast cancer
- No new breast symptoms
